

**AMENDMENTS TO THE SPECIFICATION**

**On page 6 of the present specification, please amend the third full paragraph as follows:**

Examples of the other compositions include an activator, viper venom, calcium ions, and a tissue factor. Preferably, the activator is at least one selected from the group consisting of ellagic acid, kaolin, and ~~sellaite~~ celite. The viper venom is preferably at least one selected from the group consisting of Russel's viper venom, textarin venom, and ecarin venom. The tissue factor may be one derived from rabbit brain, derived from human placenta, or a recombinant.
